The accompanying notes and accounting policies form part of these financial statements.

#### Notes to the Financial Statements For the Year ended 30 June 2010

#### 1. Statement of Accounting Policies

#### **Entity Statement**

GasNet Limited (the Company) is a company formed in accordance with the Energy Companies Act 1992 and registered under the Companies Act 1993.

GasNet Limited is incorporated in New Zealand and domiciled in Wanganui, New Zealand. The Company's parent entity is Wanganui Gas Limited.

For the purpose of preparing Disclosure accounts, in accordance with the Gas (Information Disclosure) Regulations 1997, the annual accounts of GasNet limited and Wanganui Gas Limited (being the consolidated financial statements of both GasNet Limited and Energy Direct Limited) have been used to prepare these accounts.

The gas information disclosure and financial statements of GasNet Limited have been prepared in accordance with the Gas (Information Disclosure) Regulations 1997.

The financial statements are for the year ended 30 June 2010 and were authorised for issue by the Board of Directors on 30 November 2010.

#### Methodology of Separation of Business

The Methodology used in relation to the allocation of costs, revenue, assets and liabilities will be available for public inspection no later than 30 November 2010.

#### Statement of Compliance and Basis of Preparation

These financial statements have been prepared in accordance with the requirements of the Companies Act 1993, the Financial Reporting Act 1993 and the Energy Companies Act 1992. The financial statements have also been prepared in accordance with Generally Accepted Accounting Practice in New Zealand and therefore comply with the New Zealand equivalent of the International Financial Reporting Standards. For this purpose the Company has defined itself as profit orientated.

The financial statements are prepared using the historical cost basis except where modified by the revaluation of certain assets and liabilities which are recorded at fair value. These are detailed in the specific policies below.

The financial statements are presented in New Zealand dollars, which is the Company's functional currency.

#### Significant Accounting Policies

The following particular accounting policies which materially affect the measurement of results and financial position have been applied:

#### Revenue

Revenue is derived from gas network distribution services. Such revenue is recognised when earned and is reported in the financial period to which it relates.

Interest income is accrued on a time basis, by reference to the principal outstanding and the effective interest rate applicable.

#### Goods and Service Tax

All items in the financial statements are exclusive of GST, with the exception of accounts receivable and accounts payable which are stated with GST included. Where GST is not recoverable as input tax then it is recognised as part of the related asset or expense.

#### Accounts Receivable

Trade and other receivables are initially measured at fair value and subsequently measured at amortised cost using the effective interest method, less any provision for impairment. A provision for impairment of receivables is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of the receivables. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated cash flows, discounted using the effective interest method.

#### Cash and Cash Equivalents

Cash and cash equivalents include cash on hand and deposits held on call with banks.

#### Inventories

Inventories are valued at the lower of cost or net realisable value after making provision for damaged or obsolete items. Cost is determined by the weighted average method of valuation.

The amount of any write-down for the loss of service potential or from the cost to net realisable value is recognised in the profit and loss statement in the period of the write-down.

#### Investments

Investments in advances, loans and receivables, and bank deposits held to maturity are recognised at cost plus accrued interest.

#### Property Plant and Equipment

Property, plant and equipment are initially recorded at cost. The initial cost of property, plant and equipment includes the purchase consideration and those costs that are directly attributable in bringing the asset into the location and condition necessary for its intended purpose. Subsequent expenditure that extends the assets service potential is capitalised.

In most instances, an item of property, plant and equipment is recognised at its cost. Where an asset is acquired at no cost, or for a nominal cost, it is recognised at fair value as at the date of acquisition.

For those assets that are revalued, the change in valuation is credited or debited to the asset revaluation reserve for each asset. Where this results in a debit balance in the asset revaluation reserve, this balance is expensed in the statement of comprehensive income. Any subsequent increase on revaluation that offsets a previous decrease in value recognised in the statement of comprehensive income will be recognised first in the statement of comprehensive income up to the amount previously expensed then credited to the revaluation reserve for that class of asset. Additions subsequent to revaluations are recorded at cost.

The gas distribution network and gas measurement systems are valued at optimised depreciated replacement cost, adjusted by additions (at cost), disposals and depreciation. Revaluations are carried out every three years and are independently reviewed. The Company assesses the carrying value of its revalued assets annually to ensure that they do not differ materially from the assets' fair values. If there is a material difference, then the offcycle assets are revalued.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount of the asset. Gains and losses on disposals are included in the statement of comprehensive income. When revalued assets are sold, the amount included in the revaluation reserves in respect of those assets are transferred to retained earnings.

Other assets are recorded at cost less accumulated depreciation.

#### Depreciation

Depreciation is provided on a straight line basis on all property, plant and equipment at rates calculated to allocate the assets' cost, or depreciated replacement cost, less estimated residual life, over their estimated useful lives.

| Major depreciation rates are:                              |             |
|--|-------------|
| Mains & Services   | 1-10% S.L   |
| Condition Renewals   | 2% S.L      |
| Meters & Customer Station Rebuilds                         | 1-10% S.L   |
| Vehicles, Plant, Office Equipment & Furniture and Fittings | 20-33% S.L  |
| Computer Hardware & Software                               | 20- 33% S.L |
| Leasehold Improvements                                     | 10-20% S.L  |

#### Intangible Assets

Acquired computer software licences are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. These are valued at cost and are amortised over the expected useful life of the licence.

These are valued at cost and are amonised over the expected useful me of the incence.

Costs associated with maintaining computer software are recognised as an expense when incurred

The useful lives and associated amortisation rates of major classes of intangible assets have been estimated as follows Computer software 3 years 33%

#### Impairment of Property, Plant and Equipment and Intangible Assets

Assets that have a finite useful life are reviewed for indicators of impairment at each balance date. When there is an indicator of impairment the asset's recoverable amount is estimated. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use. If an asset's carrying amount exceeds its recoverable amount is written down to the recoverable amount. For revalued assets the impairment loss is recognised against the revaluation reserve for that class of asset. Where that results in a debit balance in the revaluation reserve, the balance is recognised in the statement of comprehensive income. The reversal of impairment loss on a revalued asset is credited to the revaluation reserve. However to the extent that an impairment loss for that class of asset was previously recognised in the statement of comprehensive income. The reversal of the reversal of the impairment loss is also recognised in the statement of the statement of comprehensive income.

For assets not carried at a revalued amount, the reversal of an impairment loss is recognised in the statement of comprehensive income.

#### Financial Instruments

Financial instruments that potentially subject the Company to credit risk are cash and bank balances, debtors and investments. The Company is exposed to interest rate risk through the issuance of debt instruments. The Company is not subject to currency risk. Financial instruments are recognised in the statement of financial position. Revenues and expenses in relation to financial instruments are recognised in the statement of comprehensive income. Unless covered by a separate policy, all financial instruments are shown at their fair value.

#### Financial Assets

Financial assets are initially recognised at fair value plus transaction costs, unless they are carried at fair value through profit or loss in which case the transaction costs are recognised in the statement of comprehensive income.

Purchases and sales of financial assets are recognised on trade-date, the date at which the Company commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Company has transferred substantially all the risks and rewards of ownership. The Company classifies its financial assets into the following categories: loans, receivables and fair value through equity. The classification depends on the purpose for which the investments were acquired. Management determines the classification of its investments at initial recognition.

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months after balance date, which are included in non-current assets. The Company's loans and receivables comprise cash and cash equivalents, debtors and other receivables.

Financial assets at fair value through equity are those that are designated as fair value through equity or are not classified in any of the other categories above. They are included in non-current assets unless management intends to dispose of the investment within 12 months of balance date. The Company does not hold this category of financial asset.

#### Financial Liabilities

Financial liabilities (creditors and loans) are initially recognised at fair value. These are subsequently recognised at amortised cost.

#### Impairment of Financial Assets

At each balance date the Company assesses whether there is any objective evidence that a financial asset or group of financial assets is impaired. Any impairment losses are recognised in the statement of comprehensive income.

Impairment of a receivable is established when there is objective evidence that the Company will not be able to collect amounts due according to the original terms. Significant financial difficulties of the debtor, probability that the debtor will enter into bankruptcy, and default in payments are considered indicators that the asset is impaired. For debtors and other receivables, the carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in the statement of comprehensive income. When the receivable is uncollectible, it is written off against the allowance account. Overdue receivables that have been renegotiated are reclassified as current (ie not passed due).

#### Borrowings

Borrowings are initially recognised at their fair value net of transaction costs incurred. After initial recognition, all borrowings are measured at amortised cost using the effective interest method. Borrowings are classified as non current liabilities due to the expectation that they will not be repaid in the next twelve months. Borrowing costs are recognised as an expense in the period in which they are incurred.

#### Employee Entitlements

Provision is made in respect of the Company's liability for annual leave, sick leave and long service leave. Annual leave has been calculated on an actual entitlement basis at current rates of pay, while other provisions have been calculated on an actuarial basis at current rates of pay.

Employee benefits that the Company expects to be settled within 12 months of balance date are measured at nominal values based on accrued entitlements at current pay rates.

The Company recognises a liability for sick leave to the extent that absences in the coming year are expected to be greater than the sick leave entitlement earned during the year. The amount calculated based on the unused sick leave entitlement that can be carried forward at balance date, to the extent that the Company anticipates it will be used by staff to cover those future absences. The Company recognises a liability and an expense for bonuses where contractually obliged or where there is a past practice that has created a constructive obligation.

Obligations for contributions to defined contribution superannuation schemes are recognised as an expense to the Statement of Comprehensive Income as incurred.

#### Income Tax

Income tax expense in relation to the surplus or deficit for the period comprises current tax and deferred tax.

Current tax is the amount of income tax payable based on the taxable profit for the current year, plus any adjustments to income tax payable in respect to prior years. Current tax is calculated using rates that have been enacted or substantively enacted by balance date. Deferred tax is the amount of income tax payable or recoverable in future periods in respect of temporary differences and unused tax losses. Temporary differences are differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which the temporary differences or tax losses can be utilised.

Deferred tax is not recognised if the temporary difference arises from the initial recognition of goodwill or from the initial recognition of an asset and liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised, using tax rates that have been enacted or substantively enacted by balance date.

Current tax and deferred tax is charged or credited to the statement of comprehensive income, except when it relates to items charged or credited directly to equity, in which case the tax is dealt with in equity.

#### Leases

Leases where the lessor effectively retains substantially all the risks and benefits of ownership of the leased items are classified as operating leases. Payments under these leases are charged as expenses in the periods which they are incurred.

Leases which effectively transfer to the lessee substantially all the risks and benefits incidental to the ownership of the leased item are classified as finance leases. These are capitalised at the lower of the fair value of the asset or the present value of the minimum lease payments. The leased assets and corresponding lease liabilities are recognised in the statement of financial position. The leased assets are depreciated over the period the Company is expected to benefit from their use.

#### 3 DECEMBER 2010

#### Critical Accounting Estimates and Assumptions

In preparing these financial statements the Company has made estimates and assumptions concerning the future which may differ from the subsequent actual results. Estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations or future events that are believed to be reasonable under the circumstances. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

At each balance date the Company reviews the useful lives and residual values of its property, plant and equipment. Assessing the appropriateness of useful life and residual value estimates of property, plant and equipment requires the Company to consider a number of factors such as the physical condition of the asset, expected period of use of the asset, and expected proceeds from the sale of the asset.

An incorrect estimate of the useful life or residual value will impact on the depreciable amount of an asset, therefore impacting on the depreciation expense recognised in the statement of comprehensive income, and carrying amount of the asset in the statement of financial position. The Company minimises the risk of this estimation uncertainty to its infrastructure assets by:

- an annual review by an independent contractor of the value of the infrastructure assets
- to determine if any material changes exist
- physical inspection of assets
- asset replacement programmes
- review of second hand market prices for similar assets
- analysis of previous assets sales, and
- completing a revaluation of the infrastructure assets every third year.

The Company has not made significant changes to past assumptions concerning useful lives and residual values. The carrying amounts of property, plant and equipment are disclosed in note 4.

#### Changes In Accounting Policies

There have been no changes in accounting policy. All policies have been applied on bases consistent with those used in the previous period.

The Company has adopted the following revisions to accounting standards during the financial year which have only had a presentational or disclosure effect:

#### NZIAS 1 Presentation of Financial Statements (Revised 2007).

The standard separates disclosures in relation to owner and non owner changes in equity. The statement of changes in equity now only includes details of transactions with owners, with all non owner changes in equity presented in a single line. In addition, it introduces the statement of comprehensive income, which presents income and expense items recognised in the profit or loss, together with all other items of income or expense. The Company has adopted a single statement of comprehensive income for the year ended 30 June 2010 under the revised standard. Financial statement information for the year ended 30 June 2009 has been restated accordingly. Those items of other comprehensive income presented in the statement of comprehensive income were previously recognised directly in the statement of changes in equity.

The deferred tax liability recognises all taxable temporary timing differences between the carrying amounts of assets and liabilities in financial statements and the corresponding tax bases used in the computation of taxable profit. This amount is not expected to reverse in the foreseeable future and is not a tax liability owed to the Inland Revenue Department.

| Total Debtors                | \$<br>602,928 | \$ | 643,341    |

Fair Value

Debtors are non-interest bearing and receipt is normally on 30 day terms, therefore the carrying value of debtors approximate their fair value.

#### Impairment

The carrying amount of receivables that would otherwise be past due or impaired whose terms have been renegotiated is \$nil (2009 \$nil).

| The status of debtors at 30 June are detailed below:        |                 | ution<br>I0             |                  |

Term : The loans / advances mature upon demand being made in writing by the parent, Wanganui Gas Limited. As the loans/advances mature on demand they have been disclosed as current.

Security: Unsecured.

#### Interest rate over year : 8% to 13%

The loans / advances are initially recognised at their fair value net of transaction costs incurred. After initial recognition, all borrowings are measured at amortised cost using the effective interest method.

Financial Instruments which potentially subject the Company to credit risk principally consist of bank balances and accounts receivable. Generally the Company does not require collateral. Maximum exposure to credit risk is the amount stated in the financial statements and is net of any recognised provision for losses on these financial instruments.

The Company is not exposed to any concentrations of risk or currency risk.

The Company has no bank overdraft facility.

The methods and assumptions used are that the carrying amount in the financial statements reflects the estimated fair value of the financial instruments including receivables, bank and investments and accounts payable.

The Company has long term borrowings which are used to fund ongoing activities.

Interest Rate Risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates. This could particularly impact on the cost of borrowing or the return on investments.

The Directors do not consider there is any significant exposure to interest rate risk on the Company's investments.

The interest rates on the Company's borrowings are disclosed in note 7. Interest rates are reviewed regularly.

There are no interest rate options or interest rate swap agreements in place as at 30 June 2010 (2009 : Nil).

Currency Risk

No currency risk.

Liquidity Risk

#### Management of liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty raising liquid funds to meet commitments as they fall due. Prudent liquidity risk management implies maintaining sufficient cash, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. The Company aims to maintain flexibility in funding by keeping committed credit lines available. The Company manages its borrowings in accordance with its funding and financial policies, which include a Liability Management policy.

Contractual maturity analysis of financial liabilities

The table below analyses the financial liabilities into relevant maturity groupings based on the remaining period at balance date to the contractual maturity date.

The amounts disclosed are the contractual undiscounted cash flows.

#### 13. Commitments

The Company has no commitments as at 30 June 2010 (2009: Nil)

#### 14. Contingent Liabilities and Assets

There are no contingent liabilities which would have a material adverse effect on these accounts (2009 : Nil).

#### 15. Dividend

No Dividends have been declared for 2010 (2009 : Nil)

#### 16. Post Balance Date Events

There have been no material events since balance date.

#### 17. Prior Period Error

In the 2009 financial statements net loans from related parties of \$3,075,896 were disclosed as non-current liabilities.

This year the net loans have been classified as current liabilities as the company does not have an unconditional right to defer payment for more than 12 months. As the Company did not have an unconditional right to defer payment last year either, the 2009 comparatives have been restated accordingly.

#### Statement of Performance Measures

| Unplanned Distribution System Interruptions not as a result third party damage (hours/customer).  | of                       |  | 0.0058     |      | 0.0058     |    | 0.0064     |      | 0.0085     |    | 0.0059     |       |       |
| Note: The last two performance measures are not required  |                          |  |            |      |            |    |            |      |            |    |            |       |       |

Note: The last two performance measures are not required by the Gas (Information Disclosure) Regulations 1997.

1. The increase in percentage is due to the revaluation carried

out during the year. 2. The increase in percentage is due to the revaluation carried

out during the year and the reversal of the subvention payment.

3. The increase in Unplanned Distribution System Interruptions on trelated to Transmission System Interruptions was due to water inundation outage in St Johns Hill Wanganui in late June 2010. This single significant event was caused by a leaking water pipe and contributed 0.225 hours/customer. Without that event the measure would have been 0.0296

4.The comparative percentage for 2009 has been adjusted to account for the prior period error disclosed in Note 17 of the Financial Statements

AUDIT NEW ZEALAND

Mana Arotake Aotearoa

#### Certification by the Auditor-General in relation to financial statements

I have examined the attached financial statements prepared by GasNet Limited and dated 30 November 2010 for the purposes of regulation 6 of the Gas (Information Disclosure) Regulations 1997.

I certify that, having made all reasonable enquiry, to the best of my knowledge, those financial statements have been prepared in accordance with the requirements of the Gas (Information Disclosure) Regulations 1997.

John Comile

John O'Connell Audit New Zealand On behalf of the Auditor-General Wellington, New Zealand

AUDIT NEW ZEALAND

Mana Arotake Aotearoa

#### Certification of performance measures by the Auditor-General

I have examined the attached information, being:

- financial performance measures specified in clause 1 of part 2 of Schedule 1 of the Gas (Information Disclosure) Regulations 1997; and
- financial components of the efficiency performance measures specified in clause 2 of part 2 of that schedule,

and having been prepared by GasNet Limited and dated 30 November 2010 for the purposes of regulations 15 and 16 of those regulations.

I certify that, having made all reasonable enquiry, to the best of my knowledge, that information has been prepared in accordance with the requirements of the Gas (Information Disclosure) Regulations 1997.

John Clemmell
