

Media Update No. 6

Wednesday 12 August 2020: 11:59 hours

GasNet Response to COVID-19 moving to Alert Level 2 at noon on 12 August 2020. Until then Alert Level 1 applies (refer to Media Update No. 5 of 08 June 2020)

The distribution of natural gas is deemed an Essential Service by Ministry of Business, Innovation and Employment (MBIE) which has confirmed that businesses in the sector are able to remain open during Alert Level 4 and lower Alert Levels, including any critical suppliers in their supply chains.

GasNet has determined the activities that are essential to ensure continuation of a safe and reliable supply of natural gas to consumers through our gas network and metering systems. These activities and systems will be maintained throughout the period in Alert Level 2. Our offices in Cook Street, Whanganui will be open to the public, with personnel being present during normal business hours each working day. Our office systems are operating at normal capacity and remain effective, telephone and email communications are unaffected.

All personnel have been trained in aspects of Control of Infectious Diseases and been provided with specific information relating to minimising the risk of transmission of COVID-19. In the performance of activities our personnel will limit their physical interaction with other staff and the public, principally by personal distancing. All field operatives have a range of PPE and sanitising and cleaning products to ensure they have protection and provide the same level of protection to the public. The corporate function of the business remains operational using a mix of local and remote locations.

The company's planning ensures that arrangements are in place for alternative cover for each key role. It is advisable that if contact cannot be made with a specific GasNet person that an enquiry is made via the GasNet contact number 0800 349 2050 to provide an alternative contact or use www.gasnet.co.nz/contact-us/.

Services that have been requested and/or offers made by GasNet prior to the Alert Level 2 coming into force, will be prioritised and those affected will be contacted in regard to the offer. A service such as a new gas connection, meter relocation, meter removal or meter reinstallation may be provided during Alert Level 2 if the work is necessary, and especially for reasons of public health and/or safety. Please note that due to the restrictions placed on our business over the past weeks there may be increased lead times for provision of services.

Please be aware that due to the evolving situation and our changing response to the COVID19 Pandemic, the level of services provided and lead times may change at short notice.

Please note that this does not impact on GasNet's ability to respond to emergencies. If you smell or hear gas, or have any concerns about the safety of your gas supply contact GasNet immediately on 0800 349 2050 24 hours a day, 7 days a week. If you are concerned or if there is an immediate threat to persons or property call Fire and Emergency NZ on 111.

The following table lists the Network activities that have been deemed essential to the continuation of a safe and reliable supply of natural gas to consumers; and assist specific business activity in Alert Level 2.

Table 1
Essential and specific business activity related to Network Activities

Networks – Essential Activities	Details
Emergency/Fault response <ul style="list-style-type: none"> • Gas leaks – smell of gas • High/Low/ Fluctuating gas pressure • No gas • Network damage • Network alarm monitoring (Pressure & CP) 	24/7 Emergency Response
Odorant concentration and odour level monitoring and reporting	Key safety control
District Regulator Station and Network Pressure monitoring and inspections	Ensure system reliability
Leakage Monitoring and Survey	Safety monitoring
Network plan issue service	Key safety control
Network on site locations	On request
Service disconnections	On request
New service connections	On request
Mains replacement/renewal projects	Where required for public safety or where possible while complying with Alert level 2 requirements
Network extensions – new developments	Pipe drops only, commissioning where required for public safety or where possible while complying with Alert level 2 requirements
Other work	Where required for public safety only

The following table lists the metering system activities that have been deemed essential to the continuation of a safe and reliable supply of natural gas to consumers; and assist specific business activity in Alert Level 2.

Table 2
Essential and specific business activity related to Metering System Activities

Gas Metering Systems – Essential Activities	Details
Emergency/Fault response <ul style="list-style-type: none"> • Gas leaks – smell of gas • High/Low/ Fluctuating gas pressure • No gas • Metering system damage 	24/7 Emergency Response
Odorant concentration and odour level monitoring and reporting	Key safety control
Metering system disconnections and reconnections	On request
New metering system installations	On request
Other work	Where required for public safety only

We regret that we may not be able to provide the full level of service during this Pandemic event but will make every effort to restore all services to normal levels as soon as we are able.
